MULTIPAD

The Multipad combines the performance and flexibility of an integrated PC with a gigantic touchscreen in one elegant device - for presentations, video conferencing, as a whiteboard alternative and a whole lot more.

Presenting, adapting, and sharing material in meetings is made incredibly easy, both on the spot or around the world.

- 55" crystal clear full HD technology including whiteboard and team apps for even greater ease of use
- Quick and easy communication thanks to a text and draw function and familiar file structure
- Manage presentations from a smartphone or tablet and transmit live to those not able to attend in person
- It's easy to share access to documents and graphics on any device using WiFi
- The Multipad is a seamless addition to any existing video conference system: it can be synchronised with Polycom, Lifesize, Cisco and Tandberg for video conferencing with a HD video camera, including an ambient noise filter for improved dialogue quality
